I N F O

1. - Internal Situation

a). Very important act of resistance against the Regime

-In the village of KUC(DK-0348), where half of the inhabitants joined the Cooperative, since May 1956, took place the following events:

In June 1956, certain members of the cooperative, who had been forced to join it, came to blows with other members of the cooperative who favored the collectivization. The formers tried to get rid of the cooperative, while the latter wanted to maintain it. The fighting parties used knives and axes during the conflict.

The shepherds who were with the flocks of the cooperative in the area of CATISTE(DK-4431) are displeased with the cooperative, and according to some rumors spread in CATISTE, and they don't take the necessary security measures when guarding the flocks. As a result of this, in a total of 2000 animals, about 25 have been slaughtered by the wolves.

CHAPTER SECONDFORCES OF THE MINISTRY OF THE INTERIOR AND BY-MILITARY ORGANIZATIONSARMY OF THE FRONTIERSGuard Posts of the Frontiers' Army.-Subject is aware of the existance of the following Guard Posts.(a) Guard Post of TSATISTA

At position (DK 438305) near the village of TSATISTA a guard post of the Frontier Army is stationed since some years ago, of a strength of 25-30 men belonging to GEORGUTSADES (DK 375212).

From May up to November of each year the above guard post changes station on the height MAKRIKAMBOS (DK 478277). At the place of the winter guard post a small unit of 3-4 men remains so as to take care of the building (stone-built of diameter 20x10x3,5) as well as for the administrative care of the summer guard post.

(b) Guard Post of APSADOS

At the village of APSADA and at position (DK 480326) a guard post of the Frontier Army is stationed since some years ago of the same classification and force as the guard post of TSATISTA. This during the pre-mentioned summer and Autumn months changes station to place (DK 485299). Further informations regarding the Frontiers' Army, Subject, is not aware of.

BY-COAST DEFENSIVE WORKS

Works under construction, of unknown nature at position Moni AY. THEODORON DRYMADON (DK 8544).

At the above position, where in map I:200000KERYRA-ARGYROKASTRON of New issue, it is noted by the height indicator I65, during the month of November 1955 underground tunnels of unknown nature were to have been built.

For this reason at the existing close by village of DRYMADES (DK 8446) cement and quantity of iron sticks was transferred by two lorries.

The surrounding area of the height-indicator I65 of an unknown extent, was announced as not permissible zone and the land-owners of whose the fields are within the non permissible zone, were ordered not to go any more to these. Also that the works may be supervised, 3 Russian Officers of unknown rank and weapon arrived at DRYMADES and the gathering of civilian workers as well as privates for the commencement of the construction of the works.

INTERNAL SECURITY-Supervised Zones

-During the winter of 1956 (January of February) one Siggurimi Officer arrived at the TSATISTA (DK 443I) willage and stated to the inhabitants the following: The willages TSATISTA (DK 443I)-APSAS (DK4832) and SOPIKI (DK 5037) which are nearer to the frontier have been placed in the by-frontier zone, thus called zone A. The willages MAVROYERO (DK 4434)-EHILOMO (DK 4436) and SKORIADES (DK 4639) have been placed in another frontier zone called Zone B.

So that an inhabitant of a village belonging to zone A. goes to zone B. or to the interior no permit is necessary to be issued.

So that an inhabitant of zone B. to go to go to zone A, a written permit of the Popular Committee (Community) of his village is necessary, which is visad for the arrival and departure at the place of destination. (By the Popular Committee). But for an inhabitant of zone B. to go to the interior no permit is necessary.

So that an inhabitant of the interior goes to willages of zones A. and B. a permit of the Siggurimi of his area is necessary, which is visad for the arrival and departure at the place of destination by the (Popular Committee). Should the place of his stay, belongs to the area Komitet RETHI other of

of the ARGYROKASTRO one, then he has to visa his permit at the Siggurimi of the ARGYROKASTRO area.

-Each inhabitant of zone A. or B. is obliged as per order of the Authorities to check every unknown person who loiters in the area of their villages and to inform the earliest the Popular Committee, if he should deem to him -suspicious.

-In January of 1956 the identity cards of the A. and B. zones' inhabitants were stamped by a group of policemen on page 6 by special indicative stamper. Those who were absent from their village on this day, were obliged to go to the POLITSIANI station (IK 4442) so as to stamper their identity cards.

14

Northern margin (DK 4244) and Western margin BURATO (DK 4128) produces small quantities of corn, barley, maize, potatoes and wine. The produced quantities are barely enough for the support of the inhabitants for a period of 5 months.

For this reason the inhabitants are obliged to go as workmen to the cities or to become barrel-makers so that they can make two ends meet.

(b) Area of the SUSITSA river Valley (DK 8758) with the exception of the AVLONA plain.

Produces a little of corn, barley, tobacco and cotton. The produced quantities are barely enough for the inhabitants' upkeep for five months. Before the Communist regime was established the above area was solely a stock-farming one. Later on the communist nationalised the biggest part of the pastures and the cattle breeders were obliged to become farmers and from farmers to workmen in AVLONA for a few months each year, so that they can make two ends meet. The insufficiency of cereals becomes worse by the obligatory sowing of great spaces by tobacco and cotton.

(c) Area of the DUKATI river valley (DK 7263). As it has been stated above.

-On account of the low living standard of the inhabitants of the above areas these in great majority are anticommunists.

Koperative.

-In March 1956, the State tried by means of intensive campaign to koperativeise fully the following areas.

(a) The valley of SUSITSA river and of the overlooking mountains.

The villages of the above geographical establishment, were visited by the Minister of Agriculture, whose above area forms a parliamentary constituency and with speeches

SECRET NOFORN

17

//

25X1

25X1

15

he tried for 15 days to persuade the farmers of forming Agricultural Koperatives. His so stubborn attempts did not bear any fruits, with the exception of the villages GGOMENITSA (CK 8167) SEVASTER (CK 9272) GGOLIBAS (CK 9273) and VAIZA (CK 8969) which were totally koperativercised, and of the villages TREBATSI (CK 8557) KUTSI (DK 0148) and KALARAT (CK 9351), which were halfly koperativercised. The farmers did not react in a strong style, but by the following manner which Subject observed in TREBETSI village.

-At the gathering of the village's inhabitants Husni KAPO spoke extensively re the benefits of the koperativercisation, who at the end of his speech called the famers to participate in the koperativa. From the famers only about 20 members of the A.C.P. declared participation the rest of the bulk of the farmers being present silently. After the above manner (in which things took their course) the Minister called each one and requested explanations re his situation, saying in the same time, that the one not wishing to subscribe in the koperativa is an enemy of the regiem and the best thing which he has to do is to take the weapon and to come out as a bandit in the mountains. After the above psychological pressure, the half of the farmers were oblided to declare participation.

Also the following episodes took place in the village KUSSI of the above area.

- (i) Members of the koperativa which obligatorily were enscripted in the koperativa, round June of the year 1956 quarreled with members of the koperativa which were from the beginning for koperativercisation with the intention of dissolving the koperativa in so far as the ones were concerned and the others to maintain it. During the quarrel knives and axes were used.
- (ii) The guards of the sheep who guard the koperativa's flocks in the mountains

18 //

SECRET NOFORN

25X1

16

of the TSATISTA area (IK 443I) (only during the summer months) owing to contrast towards the koperativa, as per the rumours which circulate in TSATISTA, they do not undertake the necessary security measures with a result that about 25 heads out of 2000 to be eaten by wolfs.

25X1

25X1

b) Valley of river DUKATI (Southwards of AVLONA).

In the above area, the same month as above, the Parliamentary Member of the area, Aki TOSKA (Subject does not remember well the name) toured for the same reason, who met with practically entire failure as only in the village of DUKATES (CK 7857) out of 500 families the 20 formed a koperativa and in the TRAYIAZI village (CK 7562) the half of the families.

c) Area of CHIMARA

In the above area, during the above month Minister Spiro KOLEKA toured for the same reason, who only the villages PIKERAS (DK 063I) and SAZANI (DK 083I) was able to persuade to form koperativa, the rest of the villages denied the koperativisation.

d) Area of ARGYROKASTRO.

Subject, does not know who toured the ARGYROKASTRO area, but he is aware that a great part of the Southern part's villages of ARGYROKASTRO (DRMO Valley) formed a koperativa. From the villages of the area, the LAZARET always bears the greatest opposition.

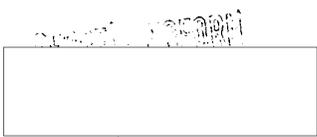

e) Area of AVLONA.

All the villages of the above area with the exception of the SKORIADES (IK 4639) which from 1954 happens to be a koperativa denied to be koperativised.

SECRET NOFORN

25X1

25X1

17

-The following are the reasons of the farmers for denying to form agricultural koperatives:

-The permnent loss of their property.

-The based on the Normas payment of only the working members of one family, without taking into consideration as to how children and eld people will be fed.

-The obligatory labour from the very early hours up to the first darkness.

-Thus those who belong to the koperatives non communist farmers, thinking that they are working for others, thus working with great unvillingness, with a result that production to be reduced.

The free agricultural farmers, pf the half koperativercised villages, bearing in view the misery of their villegers who have been koperativercised, become more pertulant to the Nation's demands for koperativercation.

-In September 1956 the communists will give a battle for koperativercasion.

Cattle-brading

The following villages feed the following numbers of cattle.

-TSATISTA (DK 4431) Village.

400 sheep, 900-1000 goats, bulls 200 and about 100 able to carry heavy loads.

-CHLOMO (DK 440355) Village

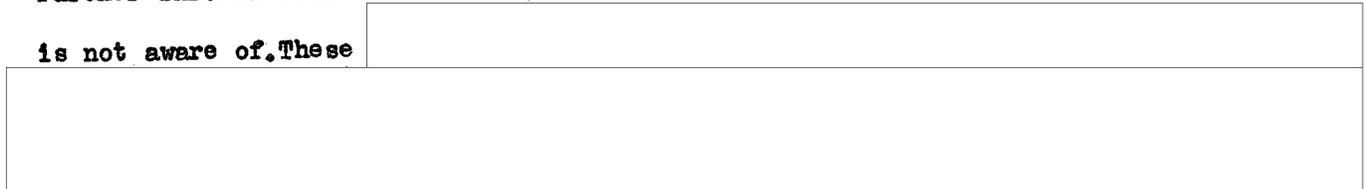

400 sheep, 700 goats, 150 balls and about 100 able to carry heavy weights

25X1

-MAVROYERO Village

150 sheep, 150 goats, bulls 50 and able to carry heavy loads (animals) about 15.

Further informations in connection with the farming and cattle breeding Subject is not aware of. These
